MILITARY INTELLIGENCE REPORT

== SECRET II ==

PRECEDENCE: URGENT (FLASH)

HUMINT

REPORT NO.	7731-HUM-2026-114
DATETIME GROUP:	051430Z DEC 26
FROM:	INTELLIGENCE UNIT 7731, CPT [redacted], COLLECTION OFFICER
TO:	DARSENIA INTELLIGENCE COMMAND HQ
SUBJECT:	UNIDENTIFIED VESSEL PHOTOGRAPH - NEAR AURORA INCIDENT SITE
SOURCE GRADING:	B / 2

05-DEC-2026 HQ COM1045-0789

1. SUMMARY

At 041900Z DEC 26, a walk-in source provided UNIT 7731 with photographs purporting to show a vessel present in the vicinity of the DRV Aurora at the time on the eve of 2 December incident. The source requests anonymity and protection. The image carries embedded location and time data consistent with the incident. UNIT 7731 requests HQ guidance on source handling and exploitation of the material.

2. SOURCE

- A Belvarian Coast Guard Officer, [redacted], formerly worked as a paid-informant during the border dispute in 2009. Identity withheld pending HQ direction.
- First contact initiated by the source via an encrypted channel. Motivation assessed as a mix of grievance and political ideology; financial inducement not requested.
- Reliability provisionally graded B. The source produced specific, verifiable detail but is new and unvetted. Possibility of a provocation or deliberate feed cannot be excluded at this stage.

3. COLLECTED INFORMATION

- Digital photograph, taken on a personal mobile device, showing a single offshore-supply-type vessel at estimated range 300 m, side-on, in overcast conditions.
- Visible on the hull: Partial vessel name. Dark hull, White stern superstructure, Orange deck crane.
- EXIF indicates coordinates within the disputed zone and a timestamp.

4. ASSESMENT

- Metadata is consistent with the reported account, but metadata can be fabricated or altered. Independent confirmation (AIS history, satellite imagery) is required before any attribution.
- It is assessed as probable that the photograph is authentic and that the vessel was present as described. It is not established who operates the vessel or whether its presence was connected to the incident.

5. REQUEST OF GUIDANCE

HQ direction is requested on the following:

- **Authentication**: authority to task technical analysis of the image and metadata, and to cross-check the IMO identifier against maritime registries and AIS records.
- **Source handling**: whether to formally recruit and vet the source, and what protection may be offered.
- **Communications security**: approval to maintain contact via the current encrypted channel pending vetting.
- **Dissemination**: whether this report may be shared with the Coast Guard and the Foreign Ministry, or held within the Directorate pending authentication.

END.
